

## NON-EMERGENCY MEDICAL TRANSPORT

Our appetite includes Autos, Vans, Ambulances and their businesses that operate as Non-Emergency Medical Transport, as their business is primarily involved in transporting passengers who are physically disabled (wheelchair bound) or are under non-emergency medical care.

This includes Para-Transit, Medical Transport Vans, and Ambulances used on non-emergency basis transporting patients on a scheduled basis to medical facilities, such as a dialysis treatment center or from a nursing home to a medical facility. While the program includes operations using vehicles designated as Basic Life Support or Advanced Life Support, it does NOT include Emergency Transportation or vehicles used by police, fire departments or any other first responder operations (911).
