

As a well-recognized leader in the forest products industry, I have the utmost respect for Continental and am comfortable knowing that my company is dealing with an organization which holds itself to a higher standard of knowledge and integrity.

– Insurance Agent

Analyzing operations, pinpointing risks and providing solutions is what we do.

RISK ASSESSMENT

With our unique, consultative approach, we are here to guide your questions on new construction, existing systems, and general procedures. When you ask for our help, you become our priority 365 days a year. We will lower your chances of catastrophic losses by providing in-person risk assessments and technical evaluations of your facility and operations, a comprehensive set of workplace safety procedures, and the expertise of our multifaceted team.

SAFETY AND RISK MANAGEMENT

By focusing our efforts on safety, your operations will run more smoothly and you will have a more productive and healthy workforce.

TECHNICAL CONSULTATION

In assessing an operation, our team looks from top to bottom so we can deliver the best protection plan at the best price.

TECHNICAL LOSS ANALYSIS

We focus on what we can do *before* a claim occurs. Evaluating prior loss and accident records is one way we reduce future claims.

UNDERWRITING/ RISK EVALUATION

Internal and external forces can contribute to your exposures. We analyze and diminish these risks so you can continue to grow.
